

GAME OF SOLES (GOS)

GET MOVING. KEEP EARNING.

ABOUT

“Game of Soles” is an innovative decentralized platform that enables people to earn cryptocurrency by walking, running and training with NFT shoes they purchase. Convert your steps into cryptocurrencies like Bitcoin and Ethereum effortlessly, and enjoy Move2Earn for free!

“Game of Soles” offers an optimum combination for users who seek to maintain a healthy lifestyle with the help of digital world.

The platform gives opportunity to earn cryptocurrency by using digital shoes for physical activities. These shoes are offered as Non-Fungible Tokens (NFTs), each designed with unique attributes. Users can choose and purchase their desired shoes as NFTs, which allows them to strengthen their shoes and earn cryptocurrency by walking.

Along with NFTs, users can also gain exposure to the market by holding the native token \$GOS boosting the potential of a higher passive income through staking and farming rewards.

WHY CHOOSE GOS?

Here is why you need to join “Game of Soles” community.

- a. Earn cryptocurrency by walking, playing, running or doing any other physical activity.
- b. Get rewarded for your steps in \$GOS tokens that can be exchanged for major coins like Bitcoin, Ethereum, MATIC, USDT, USDC, JPYC, and more
- c. Stay motivated to walk every day and improve your health and fitness
- d. Earn \$GOS tokens by completing tasks within the time limit
- e. Easy-to-use interface and clear instructions

VISION

“Game of Soles” is a free app which aims to rewards your steps from your physical activity with a new-generation currency \$GOS tokens which you can spend on cool products or donate to charity.

We focus on improving your health which increases your productive and help you save billions of dollars in healthcare.

MISSION

Here is what the platform pursues

- a. Become a pioneering web3 platform that eliminates the imbalance between the physical and digital world
- b. Create an innovative ecosystem to counter the problems of DEFI and gaming reward system

- c. Bring a revolution through innovation and awareness of physical and mental health
- d. Every user is given an equal and fair chance to join the platform and earn rewards

GOS FOR ITS COMMUNITY

“Game of Soles” aims not only to engage individual users but also to foster communities. Users can compete with friends, share achievements, and walk, run or train together. The platform provides communication channels such as forums, chat rooms, and social media groups to facilitate interaction and support among users. Collaborations with shoe brands and organizations hosting sports events further enhance the project’s success.

HOW DOES \$GOS WORK?

\$GOS model is very simple. Users initiate their fitness journey by registering on the \$GOS platform. They choose from various NFT shoes options available on the platform. The digital shoes are created with different powers and attributes. Users can purchase their desired shoes using cryptocurrency and become owners of the corresponding NFT tokens.

At this stage, the user gets into a smart contract with the platform which records ownership of the shoes. Once users have purchased their shoes, they start walking in the real world. “Game of Soles” platform tracks their steps and unlocks the levels of their shoes accordingly. The more steps users take, the more their digital shoes upgrade, resulting in increased cryptocurrency earnings. The number of steps of users are recorded by the platform using a mobile application or connected smartwatches. This data is processed by the smart contract, enabling users to earn cryptocurrency.

GAME OF SOLES PLATFORM:

- a. NFT MONETIZATION

With the ability to monetize NFTs, exposure will increase with adoption

- b. PASSIVE INCOME

Stake, trade and hold and provide LP to generate passive income and move to earn.

- c. ENHANCE NFT LIQUIDITY

Using attributes of shoes and NFTs will increase the liquidity

- d. SUPERIOR INTERFACE

User friendly interface will make it easier for users to interact with the platform

\$GOS FOR CORPORATES

The platform innovatively tackles the common issues faced by the corporates. Here are some issues:

a. HIGH TURNOVER RATE

Employee Turnover turns out to be very costly for the companies as they have to spend too much on recruiting and training new employees.

b. LESS PRODUCTIVITY

When employees does not perform their responsibilities well and the team does not function at their best, it adversely impact the bottom line.

c. HEALTH COST

High sick leave adversely impacts the company productivity and also the healthcare cost of the employees

HOW \$GOS TACKLES IT FOR CORPORATES

With the help of physical activities and corporate wellness tools, \$GOS benefits as below:

- a. Create a positive workplace culture and retain top talent with engaging activities
- b. Reduce turnover rate by boosting employee morale with physical activities
- c. Transforms the workplace into a healthier, happier, and more productive environment with \$GOS
- d. Promote better health, reduce healthcare costs with physical activities
- e. Enhance employee relationships and happiness with engaging activities outside of work on our HR solutions platform
- f. Build stronger teams and boost performance

SHOEVERSE

At a later stage of the road map, “Game of Soles” will launch its own metaverse with the name “Shoeverse”. To experience this, Users need to hold at least one NFT of any element and minimum amount of \$GOS tokens. Higher the amount of NFT and \$GOS tokens the user holds, it will unlock new features of metaverse.

Users will be able to stake their NFTs & shoes here. Users will be able to participate or compete in Shoes contests, fashion shows and battles to win more \$GOS tokens. Newbies will begin their journey into the Shoeverse by buying/selling/trading or staking their digital shoes but they will have lower APY% compared to old and loyal users.

The Shoeverse will be later on, integrated with the metaverse gaming platforms like Decentraland and Sandbox. Shoes will be made wearable for the Avatars in the metaverse. “Game of Soles” will become a digital shoe brand in the digital world.

UTILITY OF \$GOS TOKENS

Unlock the endless utility “Game of Soles” offers to its users.

- a. \$GOS token will be utilized as the native token to add Utility to NFT via staking, farming and LP which generates the passive income.
- b. \$GOS will be used as the SWAP fee for the NFT SWAP.
- c. \$GOS tokens will be required to pay for minting/farming new shoes NFT in the platform.
- d. \$GOS will also be used as the entry ticket to the Shoeverse (own metaverse platform) and at the later stage for incentivizing in the play to earn game such as battles, contests and fashion show.
- e. \$GOS token will be used for the project governance and receive additional incentives

GAME OF SOLES PLAY MODES

a. INDIVIDUAL MODE

In individual Mode, players are equipped with NFT shoes to earn tokens by moving. Stamina is required to earn \$GOS tokens. Each stamina equals 10 minutes of move & earn movement and stamina, which starts replenishing after players acquire an NFT shoes.

b. COMPETITON MODE

In Challenge Mode, there are challenges for players to join. Players must register for the Challenge session at least 24 hours before launch. On registration, a returnable fee will be charged to guarantee responsibility from players.

ROADMAP

July 2023

- Project team building
- Contract verification
- Researching
- Token allocation

August 2023

- Community building
- Website launch
- Token launch
- Marketing Kick-off

September 2023

- Exchange listings
- Motion and GPS Building

- Core app building
- Shoes NFTs launch

Q3, 2023

- Shoes & other merchandise launch
- NFTs launch
- Beta version launch (for limited users)
- NFTs leaderboard unlocking

Q4, 2023

- Activities launch for earning tokens
- "Game of Soles" NFT swap launch
- Introduction to Shoeverse
- Various partnerships

Q1, 2024

- DAO - \$GOS improvement proposals
- Cross-chain solution
- Shoes system launch
- Competition mode unlocking

SMART CONTRACT EXPLANATION

Here are some explanations of the different aspects of codes in smart contract:

Explanation 1 : This smart contract represents the \$GOS Token, a BEP20 standard token used within the "Game of Soles" platform. The token is initialized with the name "Game of Soles token" and symbol "GOS". Upon deployment, the contract's creator is allocated an initial supply of 1,000,000 tokens.

Explanation 2 : This smart contract represents the Game of Soles NFT (Non-Fungible Token). It uses the BEP20 platform for NFT functionality. The contract allows for the minting of new NFTs by incrementing the token ID, assigning it to the recipient's address, and associating a tokenURI (metadata) with the token.

Explanation 3: This smart contract represents the main contract of the "Game of Soles" platform. It interacts with the Token and NFT contracts. Upon deployment, it takes the addresses of the deployed Token contracts as constructor parameters. The `purchaseShoes` function allows users to purchase shoes by minting an NFT with the provided tokenURI and transferring the corresponding token to the buyer's address using the \$GOS token. These smart contracts provide a foundation for the "Game of Soles" project, including the token, NFT, and the main contract that handles the purchase of shoes. They can be further

customized and extended to incorporate additional functionality as per the requirements of the "Game of Soles" platform.

FACTORS TO EARN \$GOS TOKENS

There are four main factors to earn \$GOS tokens as below:

a. SHOE TYPE:

Each shoe will help you obtain a different amount of \$GOS tokens. So please understand the shoe type before choosing to buy one.

b. SHOE PERFORMANCE:

The higher the performance, the more \$GOS you can obtain. There are various levels of difficulty. Users are free to control the transition between these monetization modes.

c. SPEED OF SHOES:

The higher the Speed, the more \$GOS tokens you get. Users have complete control over switching between the earning modes according to the speed.

d. MOVING SPEED:

To get the most rewards, users should move at the ideal speed of their shoes' ideal speed. Your profit will drop by up to 90% if you slip outside of this range (this also depends on the difference in speed with range)

SHOE CREDITS

There are multiple credits available according to the feature of shoes:

a. EFFICIENCY:

Solo Mode, Party Mode, Marathon Tournaments Efficiency has a role in \$GOS tokens earning in Solo Mode. With a greater Efficiency Attribute, you'll earn more \$GOS per unit of stamina consumed. Higher Efficiency leads to a faster collection of Leaderboard points.

b. DURABILITY:

Durability is defined as the "stamina" of the shoes. As the user moves, Endurance will decay. Digital Shoes are penalized for a "worn-out" according to the durability points of shoes.

c. RECOVERY:

"Recovery" affects the shoe's durability. A higher "Recovery" will result in a slower Endurance decline. If you have a high-quality shoes, you have to pay a higher repair fee for it.

SHOES LEVEL

Users can upgrade their Shoes level by forging their \$GOS tokens. Each level up requires a certain amount of time to complete, which will increase in tandem with the amount of \$GOS tokens needed as the Shoe level increases. More tokens can be used to speed up this process. Users will get 4 - 12 extra Attribute points as they level up, which they can apply to their Shoe quality.

Quality	Attribute Point/Level up
Common	4
Uncommon	6
Rare	8
Epic	10
Legendary	12

ANTI CHEATING SYSTEM

Penalties will be applicable to accounts found to be fraudulent. There are three approaches coded in the application to prevent users from cheating.

- GPS tracking
- Motion sensors and health data
- Automatic protection of AI through data duplication

User account's remaining \$GOS tokens & NFTs will be burned/purged if they are found cheating. The delivered shoes will also be forfeited from wallet to inventory.
